The Film laboratory. [Motion picture] Indiana University Audio-Visual Center, 1974.

19 min sd color 16 mm

CREDITS: Producer and writer, Philip Stockton.

SUMMARY: Discusses and demonstrates the laboratory procedures involved in the production of a 16 mm. sound, color film. Part 1 follows the original film and a 1/4-inch audiotape through the following procedures: processing the original, dubbing the sound to 16 mm. magnetic film, making a work print, and edge numbering the original and the work print. Part 2 takes the edited work print and magnetic sound through the processes of conforming, transferring to optical sound, and color balancing in order to make the composite answer print

Food. [Motion picture] BBC-TV, London, 1970. Released in the U.S. by Time-Life Films.

20 min. sd. b&w, 16 mm. (The Human body, no. 7)

SUMMARY: Focuses on the diet of man, explaining that the more developed his civilization became, the more carbohydrates he began to eat, and the amount of fats and proteins in his diet dropped. Tells that man has not had time to adapt by evolution to this change. Explains how food technology has allowed man to select a rich and plentiful diet and at the same time separate palatability from nutritional value.

How to learn to sing. [Filmstrip] Audio Lingual Educational Press, 1974. Made by Yvonne Franck.

17 fr. color and b&w. 35 mm. and phonotape: 1 reel (5 in.), 7 1/2 ips., approx. 20 min.

Also issued with phonotape in cassette.

CREDITS: Producer, Charles Starr; illustrator, George Cesari.

SUMMARY: Shows how to control and modulate the voice for singing and how to exercise breath control. Designed for teaching English as a second language.

1. Singing—Instruction and study. 2. English language—Study and teaching—Foreign students. I. Audio Lingual Educational Press.

How we explore the universe. [Filmstrip] General Educational Media, 1974.

41 fr. color 35 mm. and phonotape 1 cassette (for manual or automatic projectors), 12 min. (Elementary science series, set 12)

Revised version of the 1965 silent filmstrip of the same title.

With teacher's guide.

CREDITS: Consultants, Herman Schneider, Nina Schneider; photographer, William P. Gottlieb.

SUMMARY: Describes how astronomers and other scientists acquire information about the planets, stars, and other distant bodies in the universe through observation and the application of mathematical and scientific principles. Also describes some of the tools that are used in observing astronomical objects.

1. Astronomy—Juvenile films. [1. Astronomy.] I. General Educational Media, inc. II. Series: Elementary science series. [Filmstrip. General Educational Media] set 12 74-735721

Intravenous, transhepatic, and periduodenal cholangiography. [Slide set] American Gastroenterological Association, 1974. Released by National Medical Audiovisual Center, U.S. Bureau of Health Resources Development, and National Audiovisual Center.

31 slides. color. 2 x 2 in. and phonotape 1 cassette (for manual or automatic projectors), 23 min. (Hepatic excretory function, no. 14. Clinical series)

Also issued with phonotape on reel.

Also issued as filmstrip with phonotape in cassette or on reel.

With study guide.

CREDITS: Authors, Robert N. Berk, Elliott C. Lasser.

SUMMARY: Presents a clinical concept for medical students. Describes the pharmacokinetics of iopipamide and the techniques for intravenous cholangiograms and their interpretation. Shows representative intravenous cholangiograms. Discusses echography, arteriography, and transhepatic cholangiography in the diagnosis of biliary tract disease.

1. Bile-ducts—Radiography. I. American Gastroenterological Association. II. National Medical Audiovisual Center. III. United States. Bureau of Health Resources Development. IV. National Audiovisual Center. V. Series: Hepatic excretory function. [Slide set] no. 14.

Introduction to extra-oral radiography—the film cassette. [Motion picture] U.S. Veterans Administration, 1972. Released by National Audiovisual Center.

4 min. sd. color. 8 mm. (Extra-oral radiography)

Loop film in cartridge. Magnetic sound track.

Also issued in 16 mm. on reel with optical sound.

CREDITS: Author, A. G. Richards.

SUMMARY: Explains how dental examinations are enhanced by radiographs, which cover areas larger than possible with intraoral films and have better definition than panoramas. Describes the equipment necessary for extraoral radiography in the dental office.

1. Teeth—Radiography. I. United States. Veterans Administration. II. National Audiovisual Center. III. Series: Extra-oral radiography. [Motion picture] 75-701652

Introduction to fire behavior. [Motion picture] U.S. Dept. of Agriculture, 1960. Released by National Audiovisual Center.

17 min. sd. color. 16 mm.

With sound track in Spanish.

SUMMARY: Uses animation and table top photography interspersed with actual fire scenes to show the basic fundamentals for combustion and the influences of fuel, weather, and topography on fire behavior. Emphasizes the many factors that make a fire burn and demonstrates how strategy can be planned from this knowledge.

Introduction to flight. [Motion picture]

see

Fixed wing primary flight training. Part 1: Introduction to flight.

Introduction to forensic medicine. [Motion picture] National Medical Audiovisual Center in cooperation with Emory University School of Medicine, 1970. Released by National Medical Audiovisual Center and National Audiovisual Center.

28 min. sd. b&w. 16 mm.

Kinescope.

SUMMARY: Dr. Milton Helpen provides a basic introduction to the functions of the office of medical examiner, including a discussion of approaches to deductive reasoning and examination in the field of forensic medicine. Discusses the integrity required; the interpretative ambiguity of the position; and the examiner's interrelationship with the community, the hospital, the physician, and the law.

Methadone—an American way of dealing.

Method for rapid electrophoresis. [Motion picture] U.S. Public Health Service Audiovisual Facility in collaboration with St. Joseph's Infirmary, 1966. Released by National Medical Audiovisual Center and National Audiovisual Center.

11 min. sd. color. super 8 mm.

Loop film in cartridge. Magnetic sound track.

Longer version (12 min.) also issued in 16 mm. on reel with optical sound.

SUMMARY: Shows the electrophoretic apparatus, explaining the function of its parts and how to set up the machine. Demonstrates the technique of applying serum samples to the membrane and the step-by-step procedure for clearing and staining the resulting image.

1. Immunoelectrophoresis. I. United States. Public Health Service Audiovisual Facility, Atlanta. II. National Medical Audiovisual Center. III. National Audiovisual Center.

Metric measure made easy. [Motion picture] David Nulsen Enterprises. Released by AIMS Instructional Media Services, 1974.

14 min. sd. color. 16 mm.

Elementary school edition of the motion picture entitled *A Metric America*.

With teacher's guide.

SUMMARY: Explains the metric system, paying close attention to the process of measurement and how this process applies using meter, liters, kilograms, and Celsius. Stresses the decimal nature of the metric system. For elementary grades.

1. Metric system—Juvenile films. [1. Metric system] I. David Nulsen Enterprises. II. AIMS Instructional Media Services. III. Metric America. [Motion picture]

75

Metric measurement. [Filmstrip] Q+Ed Productions, 1975.

64 fr. color. 35 mm. and phonodisc: 2 s. (1 s. for manual projector, 1 s. for automatic projector), 12 in., 33 1/3 rpm., approx. 11 min. (Primary mathematics 2: an introduction to metric measurement, no. 5)

Also issued with phonotape in cassette.

With teacher's guide and student activity book.

CREDITS: Producer and director, Michael Halperin; writer, Margaret Schultz; consultant, Henry Palmer.

SUMMARY: Introduces metric measurement. Shows how children learn to use a meterstick and use metric containers for measuring lemonade. For primary grades.

1. Metric system—Juvenile films. [1. Metric system] I. Q+Ed Productions. II. Series: Primary mathematics 2: an introduction to metric measurement. [Filmstrip] no. 5.

Metric measurement for today. Part 2: Volume. [Motion picture] Metricraft. Released by Doubleday Multimedia, 1975.

11 min. sd. color. 16 mm.

Also issued in super 8 mm.

With teacher's guide.

SUMMARY: Visualizes the conceptual relationship among common metric units by using six actors to represent common prefix units. Explains the cubic units for expressing volume and capacity, focusing on the cubic centimeter, the cubic decimeter, and the cubic meter. Relates these units to the units of liquid volume: the milliliter, the liter, and the kiloliter.

1. Metric system. [1. Metric system] I. Metricraft (Firm) II. Doubleday Multimedia.

Metric measurement I: Measurement and why we need a standard unit. [Motion picture] Goldberg-Werrenrath Productions. Released by Journal Films, 1974.

14 min. sd. color. 16 mm. (Beginning mathematics series)

With teacher's guide.

CREDITS: Educational consultant, Max S. Bell.

SUMMARY: Shows how the metric system is based on the number ten. Uses a variety of examples from everyday life in order to show how metric units are employed to measure weight, distance, and temperature. For primary grades.

1. Metric system—Juvenile films. [1. Metric system] I. Goldberg-Werrenrath Productions. II. Journal Films, inc., Chicago. III. Title: Measurement and why we need a standard unit. [Motion picture] IV. Series: Beginning mathematics series. [Motion picture].

74

The Metric system. [Filmstrip] Harper & Row, Publishers, 1974.

6 filmstrips (approx. 55 fr. each) color. 35 mm. and phonotape: 6 cassettes (for manual or automatic projectors), approx. 18 min. each.

With instructor's resource guide by Glen Howard.

CREDITS: Writer, James Cordes; voices, Jane Kurson; consultant, Louis F. Sokol.

SUMMARY: Uses a series of humorous stories in order to introduce the concepts and units of measurement of the metric system.

CONTENTS: 1. Gone with the inch; or, Why metrics?—2. The Mummy's gloom (prefixes, abbreviations, and base units)—3. Crankenstein meets literman (volume and capacity)—4. The Maltese chicken (mass or weight)—5. A day at the chases; or, Up at metric downs (linear and cubic measures)—6. The wizard of metric (temperature and electricity)

The Metric system: Advantages of going metric. [Filmstrip] Creative Visuals, 1974.

36 fr. color. 35 mm. and phonotape: 1 cassette, 20 min.

With teacher's guide.

CREDITS: Author, Richard D. Bowles; editors, Judith H. Rickey, Ariel LaFond.

SUMMARY: Compares the English system of measurement with the metric system, illustrating the advantages of the metric system. Discusses the different structures of the two systems, the conversion factors within the systems, and the ambiguity of the English system.

1. Metric system. [1. Metric system] I. Creative Visuals (Firm) II. Title: Advantages of going metric. [Filmstrip]

Metric system: metric measurement—area, volume. [Slide set] Denoyer-Geppert Audio-Visuals, 1975.

20 slides color 2 x 2 in.

With program notes.

SUMMARY: Explains how area and volume are derived from measurements based on length and that the units of area and volume are based on the metric unit of length, the meter. Shows that units of area are converted into one another by multiplying or dividing by hundreds. Converts units of volume into one another by multiplying or dividing by thousands. Includes practice problems involving the metric system.

1. Metric system. 2. Volume (Cubic content)—Measurement. 3. Area measurement. 1. Metric system. 2. Volume (Cubic content)—Measurement. 3. Area measurement. 4. Measuring. I. Denoyer-Geppert Audio-Visuals
